We feel immense pleasure to introduce ourselves as Shri Balaji Spun Pipes engaged in the manufacture of Heavy Precast Cement Products (Castings in various grades and Sizes), for the Infrastructure sector, we can assure you that we can provide you Best Products in the industry at a very Reasonable rate. Given below is our manufacturing capacity and Product Details:

Shri Balaji Spun Pipes, Proudly Established in 2007 at Dharuhera, today it became a brand name of quality and Efficient supply. We are trusted manufacturer of different kind of RCC pipes and RCC product. We use very High Quality methods of manufacturing RCC product which provide best product with best Quality in Market which makes us a reputed manufacturer of RCC Pipes, and RCC Manhole Covers etc. These products are manufactured using advanced technology and quality tested RCC cement as per the international parameters. Our offered products are known for their features like low maintenance, weather resistance, high strength, easy to install and strong construction. Our offered products are made available in number of designs and sizes for our valuable clients to choose from.

Our Products

RCC Hume Pipes

Reinforced Concrete Pipes, abbreviated as RCC Hume pipes are extensively used for water mains, sewers, culverts, irrigation supply, and in cable management. Owing to its properties subsuming high tensile strength, durability, leak- proof nature, low maintenance, sturdiness, RCC Pipes are widely preferred in the construction industry.

Our Pipes are at par with the highest standards of quality. On account of maintaining supreme quality, we subject the concrete pipes to various tests including the load tests. Our years of experience in the cement trading sector come handy when it comes to choosing premium raw materials to produce high-tensile RCC Pipes.

Some Industry Uses: -

RCC Hume Pipes (Also known as Spun Pipes) are used for sewerage, drainage, culverts, irrigation, water supply and transportation, service lines etc.

SPECIFICATION:

Class	Description	Conditions Where Normally Used
NP2	Reinforced concrete, light-duty, non-pressure pipes	For drainage and irrigation use, for cross drains/ culverts carrying light traffic
NP3	Reinforced concrete, medium-duty, non-pressure pipes	For drainage and irrigation use, for cross drains/ culverts carrying medium traffic
NP4	Reinforced concrete, heavy-duty, non-pressure pipes	For drainage and irrigation use, for cross drains/ culverts carrying heavy traffic

Internal Diameter	Length	NP2 Class		NP3 Class	
		Wall Thickness	Pipe Weight	Wall Thickness	Pipe Weight
MM	MM	MM	KGS	MM	KGS
150	2000	25	80	25	95
200	2000	25	108	30	115

Reinforcement Weight Used In Rcc Pipes -

Size	Rcc Hume Pipes Np2 Reinforcement Weight in kg.	Rcc Hume Pipes Np3 Reinforcement Weight in Kg.
150 MM	1.50	1.60
200 MM	1.90	2.20
250 MM	2.10	2.25
300 MM	2.90	4.20
400 MM	3.50	5.00
450 MM	4.50	5.75
500 MM	5.50	6.60
600 MM	6.50	8.50
900 MM	21.0	33.00
1000 MM	26.0	38.00

Note – Wt. May Vary A little In Grams.

Manhole Covers

Concrete manhole covers are framed lids that are lodged over the manholes to ensure that no creature/object falls into the manholes. These should ideally be sturdy & well- fitted to eliminate the risk of accidents on the roads.

We have incorporated special features in our manhole covers to make it long lasting and easy to lift, such as location of our hooks allow the cover to be lifted using the frame as fulcrum, etc.

We manufacture A-1 quality of manhole covers that are flat, solidly built, & accurately curated in order to avoid dislodging. We assure that the covers are sturdy enough to stand heavy traffic. BRHC offers all the types & shapes of manhole covers — circular, square & rectangular.

These are produced using the latest vibro-compaction technique to ensure durability, high tensile strength and robustness.

Manhole covers of customized sizes can also be manufactured on request. Covers can be provided with holes for storm water drainage. Concrete Grade M30 or higher is used. Test Load as per (IS - 12592) for extra heavy duty is 35 MT, heavy duty is 20 MT, medium duty is 10 MT & Light Duty is 2.5 MT.

Why Us?

We are an ISI Company

Quality is the key factor that have enabled us to ride high on the strides of the success. We follow a well-defined quality management system as per ISO 9001:2015 and have acquired licence for Hume pipes as per IS 458:2003 (latest amended)..

Experience and Knowledge

We produce high grade RCC Spun Pipes that are known for the quality, durability and long life...

Talented Team Member

With an expert team have moved a forward respective domain of Manufacturing Pipes...

Customer Focused Approach

Our products are regularly updated to meet various requirements of the clients...

Timely Delivery

We never fail to deliver bulk number of products in the stipulated time frame...

Ethical Business Standard

Our products in accordance to BIS Standards .
